SUPPLEMENTARY INFORMATION: This proposed rule change is designed to adjust PTO fees in accordance with the applicable provisions of title 35, United States Code; section 31 of the Trademark (Lanham) Act of 1946 (15 U.S.C. 1113); and section 10101 of the Omnibus Budget Reconciliation Act of 1990 (as amended by section 8001 of Public Law 103-66), all as amended by the Patent and Trademark Office Authorization Act of 1991 (Public Law 102-204).

BACKGROUND

Statutory Provisions

Patent fees are authorized by 35 U.S.C. 41 and 35 U.S.C. 376. A fifty percent reduction in the fees paid under 35 U.S.C. 41(a) and (b) by independent inventors, small business concerns, and nonprofit organizations who meet prescribed definitions is required by 35 U.S.C. 41(h).

Subsection 41(f) of title 35, United States Code, provides that fees established under 35 U.S.C. 41(a) and (b) may be adjusted on October 1, 1992, and every year thereafter, to reflect fluctuations in the Consumer Price Index (CPI) over the previous 12 months.

Section 10101 of the Omnibus Budget Reconciliation Act of 1990 (amended by section 8001 of Public Law 103-66) provides that there shall be a surcharge on all fees established under 35 U.S.C. 41(a) and (b) to collect $111 million in fiscal year 1996.

Subsection 41(d) of title 35, United States Code, authorizes the Commissioner to establish fees for all other processing, services, or materials related to patents to recover the average cost of providing these services or

materials, except for the fees for recording a document affecting title, for each photocopy, and for each black and white copy of a patent.

Section 376 of title 35, United States Code, authorizes the Commissioner to set fees for patent applications filed under the Patent Cooperation Treaty (PCT).

Subsection 41(g) of title 35, United States Code, provides that new fee amounts established by the Commissioner under section 41 may take effect thirty days after notice in the *Federal Register* and the *Official Gazette of the Patent and Trademark Office*.

Section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), authorizes the Commissioner to establish fees for the filing and processing of an application for the registration of a trademark or other mark, and for all other services and materials relating to trademarks and other marks.

Section 31(a) of the Trademark (Lanham) Act of 1946 (15 U.S.C. 1113(a)), as amended, allows trademark fees to be adjusted once each year to reflect, in the aggregate, any fluctuations during the preceding 12 months in the CPI.

Section 31 also allows new trademark fee amounts to take effect thirty days after notice in the *Federal Register* and the *Official Gazette of the United States Patent and Trademark Office*.

Recovery Level Determinations

The proposed rule would adjust patent and trademark fees for a planned recovery of $643,014,000 in fiscal year 1996, as proposed in the Administration's budget request to the Congress.

The patent statutory fees established by 35 U.S.C. 41(a) and (b) are proposed to be adjusted on October 1, 1995, to reflect any fluctuations occurring during the previous 12 months in the Consumer Price Index (CPI-U). In calculating these fluctuations, the Office of Management and Budget (OMB) has determined that the PTO should use CPI-U data as determined by the Secretary of Labor. However, the Department of Labor does not make public the CPI-U until approximately 21 days after the end of the month being calculated. Therefore, the latest CPI-U information available is for the month of February 1995. In accordance with previous rulemaking methodology, the PTO uses the Administration's projected CPI-U for the 12-month period ending September 30, 1995, which is 3.2 percent. Based on this projection, patent statutory fees are proposed to be adjusted by 3.2 percent. Before the final fee schedule is published, the fees may be slightly adjusted based on actual data available from the Department of Labor.

Certain non-statutory patent processing fees established under 35 U.S.C. 41(d) and PCT processing fees established under 35 U.S.C. 376 are proposed to be adjusted to recover their estimated average costs in fiscal year 1996. Three patent service fees that are set by statute will not be adjusted. The three fees that are not being adjusted are assignment recording fees, printed patent copy fees and photocopy charge fees.

Certain trademark service fees established under 15 U.S.C. 1113 are proposed to be adjusted to recover their estimated average costs in fiscal year 1996.

The proposed fee amounts were rounded by applying standard arithmetic rules so that the amounts rounded would be convenient to the user. Fees of $100 or more were rounded to the nearest $10. Fees between $2 and $99 were rounded to an even number so that the comparable small entity fee would be a whole number.

Workload Projections

Determination of workloads varies by fee. Principal workload projection techniques are as follows:

Patent application workloads are projected from statistical regression models using recent application filing trends. Patent issues are projected from an in-house patent production model and reflect examiner production achievements and goals. Patent maintenance fee workloads utilize patents issued 3.5, 7.5 and 11.5 years prior to payment and assume payment rates of 79 percent, 55 percent and 32 percent, respectively. Service fee workloads follow linear trends from prior years' activities.

General Procedures

Any fee amount that is paid on or after the effective date of the fee increase would be subject to the new fees then in effect. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing or Transmission, where authorized under 37 CFR 1.8, will be considered to be the date of receipt in the PTO. A Certificate of Mailing or Transmission under Section 1.8 is not "proper" for items which are specifically excluded from the provisions of Section 1.8. Section 1.8 should be consulted for those items for which a Certificate of Mailing or Transmission is not "proper." Such items include, inter alia, the filing of national and international applications for patents and the filing of trademark applications. However, the provisions of 37 CFR 1.10 relating to filing papers and fees with an "Express Mail" certificate do apply to any paper or fee (including patent and trademark applications) to be filed in the PTO. If an application or fee is filed by "Express Mail" with a proper certificate dated on or after the effective date of the rules, as amended, the amount of the fee to be paid would be the fee established by the amended rules.

A notice of final rulemaking was published at 60 FR 20195 (April 25, 1995) wherein several new fee provisions were made to implement the 20-year patent term and provisional applications. Language changes were made in 37 CFR 1.16(a), (b), (d), (f), and (g) which are reproduced in this proposed rule package. In addition, fees involving 37 CFR 1.17(r) and (s) are now proposed to be adjusted by changes in the CPI to remain equal to the basic filing fee for a utility patent application.

37 CFR 7.1 Requirements.

Section 7.1, if revised as proposed, would designate the current language as paragraph (a), and would add new paragraphs (b)-(h) to clarify that the requirements for patent and patent application assignment documents, including the requirement for the fee set forth in § 1.21(h), submitted for recording also apply to instruments submitted for recording on the Government Register. Sections 7.1(b)-(h) contain language similar to that in §§ 3.21, 3.28, 3.31, 3.34, 3.26, 3.27, and 3.41, respectively.

Section 7.1(b), if revised as proposed, would provide that an instrument relating to a patent must identify the patent by the patent number, that an instrument relating to a national patent application must identify the national patent application by the application number (consisting of the series code and the serial number, *e.g.*, 07/123,456) or the serial number and filing date, that an instrument relating to an international patent application which designates the United States of America must identify the international application by the international application number (*e.g.*, PCT/US90/01234), and that if an assignment is executed concurrently with, or subsequent to, the execution of the patent application, but before the patent application is filed, it must identify the patent application by its date of execution, name of each inventor, and title of the invention so that there can be no mistake as to the patent application intended.

Section 7.1(c), if revised as proposed, would provide that each instrument submitted to the Office for recording must be accompanied by a cover sheet referring to those patent applications and patents against which the instrument is to be recorded, that one set of instruments and cover sheets to be recorded should be filed, and that if an instrument to be recorded is not accompanied by a completed cover sheet, the instrument and any incomplete cover sheet will be returned for proper completion of a cover sheet and resubmission of the instrument and a completed cover sheet.

Section 7.1(d), if revised as proposed, would provide that each cover sheet must contain: (1) the name of the party conveying the interest; (2) the name and address of the party receiving the interest; (3) a description of the interest conveyed or transaction to be recorded; (4) each application number or patent number against which the instrument is to be recorded, or an indication that the instrument is filed together with a patent application; (5) the name and address of the party to whom correspondence concerning the request to record the instrument should be mailed; (6) the number of applications or patents identified in the cover sheet and the total fee; (7) the date the instrument was executed; (8) a statement by the party submitting the instrument that to the best of the person's knowledge and belief, the information contained on the cover sheet is true and correct and any copy submitted is a true copy of the original instrument; and (9) the signature of the party submitting the instrument.

Section 7.1(e), if revised as proposed, would provide for the correction of errors in the cover sheet. Specifically, § 7.1(e), as proposed, would provide that an error in a cover sheet recorded pursuant to this Part will be corrected only if: (1) the error is apparent when the cover sheet is compared with the recorded instrument to which it pertains, and (2) a corrected cover sheet accompanied by the recording fee set forth in § 1.21(h) of this chapter and either the original recorded instrument or a copy of the original recorded instrument is filed for recordation.

Section 7.1(f), if revised as proposed, would provide that the Office will accept and record non-English language instruments only if accompanied by a verified English translation signed by the individual making the translation.

Section 7.1(g), if revised as proposed, would provide that instruments and cover sheets to be recorded should be addressed to the Commissioner of Patents and Trademarks, Box Assignment, Washington, D.C. 20231.

Section 7.1(h), if revised as proposed, would provide that all requests to record instruments must be accompanied by the recording fee set forth in § 1.21(h) of this chapter, and that the fee set forth in § 1.21(h) of this chapter is required for each application and patent against which the instrument is recorded as identified in the cover sheet.

Other Considerations

This proposed rule change is in conformity with the requirements of Executive Order 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501, et seq. This rulemaking contains one information collection entry relating to registration of government patent interests in patents. This information collection has been approved by the Office of Management and Budget under Control Number 0651-0027. This proposed rule has been determined not to be significant for purposes of Executive Order 12866.

The PTO has determined that this proposed rule change has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the proposed rule change would not have a significant impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The proposed rule change increases fees to reflect the change in the CPI as authorized by 35 U.S.C. 41(f). Further, the principal impact of the major patent fees has already been taken into account in 35 U.S.C. 41(h), which provides small entities with a 50-percent reduction in the major patent fees.

A comparison of existing and proposed fee amounts is included as an Appendix to this notice of proposed rulemaking.

In order to ensure clarity in the implementation of the proposed fees, a discussion of specific sections is set forth below.

Authority: E.O. 9424, February 18, 1944, 9 FR 1959; 3 CFR 1943-1948 comp.

2. Section 7.1 is proposed to be amended by designating the language currently therein as paragraph (a) and adding new paragraphs (b)-(h) to read as follows:

§ 7.1 Requirements

(a) Executive Order 9424 (3 CFR 1943-1948 Comp.) requires the several departments and other executive agencies of the Government, including Government-owned or Government-controlled corporations, to forward promptly to the Commissioner of Patents and Trademarks for recording all licenses, assignments, or other interests of the Government in or under patents or applications for patents.

(b) An instrument relating to a patent must identify the patent by the patent number. An instrument relating to a national patent application must identify the national patent application by the application number (consisting of the series code and the serial number, *e.g.*, 07/123,456) or the serial number and filing date. An instrument relating to an international patent application which designates the United States of America must identify the international application by the international application number (*e.g.*, PCT/US90/01234). If an assignment is executed concurrently with, or subsequent to, the execution of the patent application, but before the patent application is filed, it must identify the patent application by its date of execution, name of each inventor, and title of the invention so that there can be no mistake as to the patent application intended.

(c) Each instrument submitted to the Office for recording must be accompanied by at least one cover sheet as specified in paragraph (d) of this section referring to those patent applications and patents against which the instrument is to be recorded. Only one set of instruments and cover sheets to be recorded should be filed. If an instrument to be recorded is not accompanied by a completed cover sheet, the instrument and any incomplete cover sheet will be returned for proper completion of a cover sheet and resubmission of the instrument and a completed cover sheet.

(d) Each cover sheet required by paragraph (c) of this section must contain:
(1) the name of the party conveying the interest;
(2) the name and address of the party receiving the interest;
(3) a description of the interest conveyed or transaction to be recorded;
(4) each application number or patent number against which the instrument is to be recorded, or an indication that the instrument is filed together with a patent application;
(5) the name and address of the party to whom correspondence concerning the request to record the instrument should be mailed;
(6) the number of applications or patents identified in the cover sheet and the total fee;
(7) the date the instrument was executed;
(8) a statement by the party submitting the instrument that to the best of the person's knowledge and belief, the information contained on the cover sheet is true and correct and any copy submitted is a true copy of the original instrument; and
(9) the signature of the party submitting the instrument.

(e) An error in a cover sheet recorded pursuant to this Part will be corrected only if:
(1) the error is apparent when the cover sheet is compared with the recorded instrument to which it pertains, and
(2) a corrected cover sheet accompanied by the recording fee set forth in § 1.21(h) of this chapter and either the original recorded instrument or a copy of the original recorded instrument is filed for recordation.

(f) The Office will accept and record non-English language instruments only if accompanied by a verified English translation signed by the individual making the translation.

(g) Instruments and cover sheets to be recorded should be addressed to the Commissioner of Patents and Trademarks, Box Assignment, Washington, D.C. 20231.

(h) All requests to record instruments must be accompanied by the recording fee set forth in § 1.21(h) of this chapter. The fee set forth in § 1.21(h) of this chapter is required for each application and patent against which the instrument is recorded as identified in the cover sheet.

Revision of Affidavits Under 37 CFR 1.131

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Final Rule.

SUMMARY: The Patent and Trademark Office (Office) is amending the rules of practice relating to submission of affidavits or declarations under 37 CFR 1.131(a) to implement the relevant provisions of the North American Free Trade Agreement Act and the Uruguay Round Agreements Act, respectively. The change will allow an inventor to show a completion of the invention in this country or a NAFTA or WTO member country before the filing of the application on which the U.S. patent issued or before the date of the foreign patent, or before the date of the printed publication.

EFFECTIVE DATE: This final rule is effective May 31, 1995.

FOR FURTHER INFORMATION CONTACT: Hiram Bernstein by telephone at (703) 305-9285 or by mail addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231 marked to the attention of Mr. Bernstein, Office of the Deputy Assistant Commissioner for Patent Policy and Programs, or by FAX to (703) 308-6916.

SUPPLEMENTARY INFORMATION:

Section 331 of Public Law 103-182, 107 Stat. 2057 (1993), the North American Free Trade Agreement Act, implementing the North American Free Trade Agreement (NAFTA), amended 35 U.S.C. 104 to provide that for the purpose of obtaining a patent, an applicant may establish a date of invention in the United States, or in a NAFTA member country (Canada and Mexico), which occurred after the date of implementation (i.e., December 8, 1993). Section 531 of Public Law No. 103-465, 108 Stat. 4809 (1994), the Uruguay Round Agreements Act, implementing the General Agreement on Tariffs and Trade (GATT), further amended 35 U.S.C. 104 to provide that for purposes of obtaining a patent, an applicant may establish a date of invention in the United States, or in a World Trade Organization (WTO) member country other than a NAFTA member country, that is no earlier than 12 months after the date of entry into force of the WTO agreement (i.e., January 1, 1996).

A notice of proposed rulemaking relating to Revision of Affidavits Under 37 CFR 1.131 was published in the Federal Register, 59 FR 49876 (September 30, 1994), and in the Official Gazette, 1167 Off. Gaz. Pat. Office 96 (October 25, 1994). No written comments were received in response to this notice.

The Office is amending 37 CFR 1.131(a), which is currently limited to facts showing a completion of the invention in the United States, to allow for a submission of facts in an affidavit or in a declaration that shows a completion of the invention in a NAFTA or in a WTO member country. The WTO is established under the GATT agreement to resolve disputes between signatories to the agreement. The facts presented must demonstrate a completion of the invention prior to the effective date of a reference thought to prevent the grant of a patent or overturn the patentability of a claim in a patent under reexamination.

No substantive change has been made in 37 CFR 1.131 (a)(1) relating to a NAFTA or a WTO member country.

After further review and consideration of the proposed rule, the following modifications are made.

First, "person" recited in 37 CFR 1.131(a)(1) in regard to 37 CFR 1.42, 1.43 and 1.47 is being changed to "party" as 37 CFR 1.47(b) provides for corporate assignees to petition thereunder.

Second, reference to 35 U.S.C. 102(a) or (e) and 35 U.S.C. 103 has been added to more clearly identify the rejections that can be overcome (35 U.S.C. 102(a), (b), (d) and (e) are the only sections that recite the use of a domestic or foreign patent and a printed publication referred to in 37 CFR 1.131 as capable of being overcome as references - section (b) (35 U.S.C. 102(b)) is precluded by the terms of 37 CFR 1.131(a) and section (d) (35 U.S.C. 102(d) is applicant's own invention, MPEP 715).

Additionally, the Office recognizes that there is a potential conflict between existing 37 CFR 1.131(a) and 37 CFR 1.602(a). Section 1.131(a) prohibits affidavits or declarations thereunder when the same patentable invention, as defined in 37 CFR 1.601(n) (i.e., patentable indistinct inventions), is claimed. An interference under 35 U.S.C. 135(a), rather than antedating under 37 CFR 1.131(a), is generally the available remedy. However, 37 CFR 1.602(a) provides that when the applications or the application and the patent are owned by a single party, interferences are not declared or continued unless "good cause" is shown. This can result in a hardship where there is an issued patent that can no longer be amended as by filing a continuation-in-part application. Where there are two or more pending applications, the conflict can be avoided by filing a continuation-in-part application merging the conflicting inventions into a single application.

The Office proposed amending 37 CFR 1.131 to broaden its application to a single party where claimed inventions in a pending application or in a patent undergoing reexamination and a patent owned by the party are patentably indistinct but not identical. Under the proposed addition to 37 CFR 1.131, an affidavit or declaration could be filed by a party to overcome a 35 U.S.C. 103 rejection based on a 35 U.S.C. 102(a) or (e) patent owned by that party, where the patent claimed an invention that was patentably indistinct, but not identical to an invention claimed in an application or patent undergoing reexamination.

The proposed addition to 37 CFR 1.131 would not affect the use of the issued patent in a rejection of the pending application or the patent undergoing reexamination based on double patenting. A Rule 1.131 affidavit or declaration would continue to be inappropriate where a claim in a pending application or a patent undergoing reexamination is subject to a double patenting rejection under 35 U.S.C. 101 because the pending application or the patent undergoing reexamination claims the identical invention in the issued patent. However, where patentably indistinct but not identical inventions are claimed, an obvious type double patenting rejection can be avoided by filing an appropriate terminal disclaimer. In addition, petitions under 37 CFR 1.183 would be entertained for waiver of 37 CFR 1.131 requirements in appropriate instances where two pending applications claiming patentable indistinct but not identical inventions are held by a single party.

Third, the basis for requiring under proposed 37 CFR 1.131(a)(3) common ownership of the pending application or patent undergoing reexamination and the patent at the time the later invention was made rather than simply ownership by a single party as is used in 37 CFR 1.602(a). Also it is questioned whether the proposed 37 CFR 1.131(a)(3) and existing 37 CFR 1.78(c) and (d) were consistent or in-part duplicative.

In view of the third consideration regarding the proposed 37 CFR 1.131(a)(3) relating to the date of common ownership between a pending application or a patent undergoing reexamination and an issued patent, further study of the proposal is deemed warranted and the proposed 37 CFR 1.131(a)(3) is not being adopted at this time.

Discussion of Specific Rules:

Section 1.131(a) as amended, contains paragraphs (a)(1) and (a)(2). Previous paragraph (a) is now designated as (a)(1) and amended to allow a 37 CFR 1.131 affiant or declarant to rely upon facts occurring in a NAFTA member country or a WTO member country to show completion of the invention. The term "domestic" is being changed to "U.S." References to 35 U.S.C. 102(a) and (e) and 35 U.S.C. 103 as the rejections to be overcome by the section have been added. The paragraph is being amended from a single sentence to three sentences.

Section 1.131(a)(2) is being added, as proposed, to provide that a date of completion of the invention may not be established before December 8, 1993, in a NAFTA country, or before January 1, 1996, in a WTO Member country other than a NAFTA country.

Other Considerations:

This rule change is in conformity with the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., Executive Order 12612, and the Paperwork Reduction Act at 1980, 44 U.S.C. 3501 et seq. It has been determined that the rule changes are not significant for the purposes of Executive Order 12866.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that this rule change will not have a significant economic impact on a substantial number of small entities, Regulatory Flexibility Act, 5 U.S.C. 605(b), because the rule would affect only a small number of applications and would provide a streamlined and simplified procedure, eliminating the need for requesting waiver of the rules.

The Patent and Trademark Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States outlined in Executive Order 12612.

This rule change will not impose any additional burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq., since no record keeping or reporting requirements within the coverage of the Act are placed upon the public.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Inventions and patents, Lawyers, Reporting and record keeping requirements.

For the reasons set forth in the preamble, and pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, Part 1 of Title 37 of the Code of Federal Regulations is amended as set forth below:

PART 1 - RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1, continues to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.131 is amended by revising paragraph (a) to read as follows:

§ 1.131 Affidavit or declaration of prior invention to overcome cited patent or publication.

(a)(1) When any claim of an application or a patent under reexamination is rejected under 35 U.S.C. 102(a) or (e), or 35 U.S.C 103 based on a U.S. patent to another which is prior art under 35 U.S.C. 102(a) or (e) and which substantially shows or describes but does not claim the same patentable invention, as defined in 37 CFR 1.601(n), or on reference to a foreign patent or to a printed publication, the inventor of the subject matter of the rejected claim, the owner of the patent under reexamination, or the party qualified under 37 CFR 1.42, 1.43 or 1.47, may submit an appropriate oath or declaration to overcome the patent or publication. The oath or declaration must include facts showing a completion of the invention in this country or in a NAFTA or WTO member country before the filing date of the application on which the U.S. patent issued, or before the date of the foreign patent, or before the date of the printed publication. When an appropriate oath or declaration is made, the patent or publication cited shall not bar the grant of a patent to the inventor or the confirmation of the patentability of the claims of the patent, unless the date of such patent or printed publication is more than one year prior to the date on which the inventor's or patent owner's application was filed in this country.

(2) A date of completion of the invention may not be established under this section before December 8, 1993, in a NAFTA country, or before January 1, 1996, in a WTO Member country other than a NAFTA country.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
